DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- a composition.*
- I. Claims 1-8, drawn to antibody, classified in class 424, subclass 130.1.
 - II. Claims 9-16, drawn to a method of ~~treatment with an antibody~~ *reducing infectivity*, classified in class 424, subclass 263.1.

Additionally Groups I-II are further restricted and applicants should also elect either mannose-6-phosphate, mannose-6-phosphate receptor or insulin-like growth factor in Groups I-II for examination since each molecule has a distinct structure and activity.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the antibody could be used in a bioassay.
